	Examiner Adnan M. Mirza	Art Unit 2145	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-39 are presented for examination.
2. Restriction to one of the following inventions is required under 35 U.S.C 121:
 - I. Claims 1-29, drawn to Session/connection parameter setting, classified in class 709, subclass 228.
 - II. Claims 30-39, drawn to particular communication authentication technique, classified in class 713, subclass 168.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate method such as it is useable to Session/connection parameter setting which lacked features of the second group of claims, e.g., particular communication authentication technique, classified in class 713, subclass 168. See MPEP 806.05(d).

Invention II has separate utility such as it is usable by any system which lacked features of group I of claims; e.g., Session/connection parameter setting, classified in class 709, subclass 228.

Art Unit: 2145

4. Because these inventions are distinct for the reasons given above and because the search required for each group is different and not co-extensive for examination purpose because these groups would require different searches on PTO's classification class and subclass e.g.

a) the Group I search (1-29) would require use of search classified in Class 709, subclasses 228, (which would not be required for the Group II);

b) the Group II search (claims 30-39) would require use of search Class 713, subclasses 168, (which would not be required for the Group I), therefore restriction for examination purposes as indicated is proper.

5. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed. Any inquiry concerning this communication of earlier communications from the examiner should be directed to Adnan Mirza whose telephone number is (571) 272-3885. The examiner can normally be reached on business days during normal business hours.

6. The examiner can normally be reached on Monday to Friday during normal business hours. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jason Cardone can be reached on (571)-272-3933. The fax for this group is (703)-746-7239. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

7. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications
